

September 10, 1970

Dr. Norman Pitts  
Chas. Pfizer & Co.  
Groton, Connecticut

Dear Norm,

The doxepin pamoate protocol was revised following our interesting discussion. I also found it advisable to revise the doxepin EEG report (IV: 7-21-70), a copy of which I gave you. Please substitute the enclosed page 13, as revised, for the page is your copy.

The other preparation of doxepin has isomers in a ratio of 5:1, and no "purer" doxepin is available. For more refined isomer, I was referred to Pfizer, Inc.

It was a pleasure to have you visit, and I trust we can expedite our studies this year.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
