Fritz A. Freyhan, M.D.
St. Elizabeth's Hospital
Washington, D. C. 20032

Dear Fritz:

I have been reluctant to write a letter with regard to Dr. Joseph Slap for I know very little about his work in relationship to psychopharmacology. During his days as a resident physician at Hillside Hospital he was a co-operative staff member and a student in the psychotherapy programs of that Institute. I have no personal knowledge of his work since that period.

I am grateful for your invitation to visit with you. I had been asked by Al Kurland to consult with him in a project about electroshock and plan to visit Baltimore upon my return from the International EEG Meetings, about September 13, and would be pleased to come and visit you immediately thereafter. As I do not have an exact date for my return, I would be willing to notify you as soon as I knew the best time for me and if it is agreeable I can plan to visit you and then return to St. Louis from Washington. My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
