

February 11, 1971

Dr. Ralph W. Richter
Director, Neurology Department
Harlem Hospital Center
135th Street and Lenox Avenue
New York, New York 10037

Dear Dr. Richter:

The principal reports from this laboratory on the subject of "Neurophysiology of Opiate Addiction" are enclosed. These will provide the basis for the presentations.

I look forward to participating in the AAN didactic sessions on April 28 at the New York Hilton. While it may be too late to suggest a change in the program, you may be ill advised in inviting a presentation by Dr. J. Densen-Gerber, whose hostility to biological approaches is so well known, as to lead to a degeneration of the symposium section of the meeting.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
