England

Dear Peter,

Your kind letter at the year end sent me to my files and I extracted the memorandum you requested. As I re-read it after a lapse of 16 months, I found that my ideas about many of the suggestions were still the same. I am not sure whether to be pleased (assuming that the ideas were good then) or displeased (that I had learned so little in the time that has gone by), but it seemed worthwhile to edit the copy and update it a bit. Enclosed is a revised version for your use.

The work with Derek is going well. We have not been as successful with OI-63 as Turan has been with GB-94, but there seems to be an added effort to set up some additional laboratories and we are cooperating in this endeavor. I should be in Europe again soon, and will write to you, should a visit be of some use to you.

My best to Vi, and congratulations on your latest offspring.

Sincerely yours,

Max Fink, M.D.
