October 15, 1963

Mr. Ruderman  
Digital Equipment Corporation  
Maynard, Massachusetts

Dear Mr. Ruderman:

At the end of 1962, this Institute reviewed various systems for on-line digital analysis of EEG signals. At that time, your company was kind enough to send me some information.

I should be grateful for your most recent description of PDP-4 and PDP-5, and any other present computer equipment which may be applicable to on-line processing. I should also be pleased if you would arrange to visit with me on your next trip to St. Louis.

The present system (IBM 1710) is under review and in the event that you are able to supply equipment of greater capacity, I should like the opportunity to review it.

Sincerely yours,

Max Fink, M. D.  
Director
