

September 20, 1968

Dr. John Knott
Department of Psychiatry
University of Iowa
State Psychopathic Hospital
500 Newton Road
Iowa City, Iowa 52241

Dear John,

Enclosed are two reports of the EEG effects of psychoactive drugs. One was prepared for the Annual Review of Pharmacology (1969) and one is a summary of the presentation at the 1967 Denver meeting of the American EEG Society.

I will try to summarize the best parts of the material for technicians and send it to you shortly.

Thank you for your interest.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
