

May 24, 1963

Miss Stella Walton  
Sanchez Pacheco, 23-1 Ocha  
Madrid 2, SPAIN

Dear Miss Walton:

I should be pleased to have you join the staff of the Psychiatric Research Foundation of Missouri, on or about July 1, 1963, as a neurophysiology technician, at a minimum salary of \$335.00 per month.

I should be pleased to have you work in the laboratory of Dr. Turan Itil, who is Principal Research Scientist (EEG). The studies now in progress not only include conventional EEG recording in patients receiving a variety of psychotropic drugs, but we are also using a frequency analyzer, and are developing a variety of computer techniques for EEG analysis. As the latter are new programs, I would hope that you would participate in learning these methods.

If you will notify me about ten days before your arrival, it might be possible for us to provide you with accommodations on the grounds of the hospital for a week or ten days to permit you to find accommodations in the community.

Sincerely yours,

Max Fink, M. D.  
Executive Director
