

January 5, 1972

TO: Alfred Freedman, M.D.
FROM: Max Fink, M.D.
SUBJECT: Proposal for Medical Students, Chavez and Schwarzfarb
for Cannabis Studies

The attached protocol has been reviewed and is feasible. However, the taking of blood samples in volunteers requires special care and will interfere with their cooperation. Rhea and I believe we should pay "a bonus" for blood samples.

1. Will you approve this study?
2. From MH 18172, may we allocate \$300-400 to pay these volunteers for their cooperation?
3. May we give these men and Dr. Needles the chemicals requested? (They are available).

Thanks
