Dr. John A. Starkweather
Langley Porter Clinic
University of California Medical Center
San Francisco, California

Dear John:

At the recent ACNP meetings, I chatted with Noeh Callaway who told me that you were involved with an SDI system at the University of California. I am very much interested in the possibilities of applying such a system within our own organization. Unfortunately, I only have a reading acquaintance with the system and no practical experience.

Would it be possible for me to be included in the UC system for a three or four month trial period? If so, I will list below a series of descriptors which represent my interests and to the extent that they may be applicable in your system, please use them.

- | | |
|---------------------------|--------------------------|
| 1. Electroencephalography | 6. Psychotropic Drugs |
| 2. EEG | 7. Hallucinogens |
| 3. Brain Function | 8. Information Retrieval |
| 4. Computer Analysis | 9. SDI |
| 5. Psycholinguistics | 10. Convulsive Therapy |

Combinations: 1,3; 1,4; 4,5; 1,6; 1,7; 1,10.

Thank you very much for your help. If there are any charges for such participation, I believe that we should be able to defray them for a trial period.

Sincerely yours,

Max Fink, M. D.
Director
