

July 21, 1965

To whom it may concern:

Dr. Jovan Simeon joined the Department of Psychiatry during June. He is a graduate physician, having received his degree from the Medical Faculty of Zagreb University. He has also worked in Scotland for five years and has been awarded the Diploma in Psychiatry from Edinburgh University.

His letters of recommendation from associates and teachers were excellent. They indicated that he is a serious worker, conscientious and liked by both his teachers and co-workers.

Since his arrival here, I have found him pleasant, affable, conscientious and reliable. I have no hesitation in recommending him for licensure in the State of Missouri.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
