

November 10, 1979

Dr. Barend ter Haar
Editor, TINS
14A Regent Street
Cambridge, England

Dear Dr. ter Haar,

Since submitting an article on the neuroendocrine aspects of convulsive therapy in early August, the ECT scene in Great Britain has been noticed by the editorial writers of Lancet, British Medical Journal, and Psychological Medicine, making our article in TINS more timely.

What is the publication ~~date~~us of the report ? The last note in my file is dated 23 August 1979 and acknowledges receipt of an additional paragraph.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
