Dr. Jack Mendelsohn
Alcoholic Research Center
National Institutes of Mental Health
5454 Wisconsin
Chevy Chase, Maryland

Dear Dr. Mendelsohn:

Dr. John J. Miller, President of Miller Pharmacal Co., visited our laboratories this week to discuss the possibility of improving the dysfunction of chronic alcoholism by dietary substances containing trace minerals.

A copy of his interesting point of view is enclosed for your files.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
