Dr. Paul Rajotte  
Institut de Recherches Psychiatriques  
de Joliette  
Hopital Saint-Charles  
1000, Boul. Ste-Anne  
Joliette, Quebec, Canada

Dear Paul:

We would be pleased to have Dr. Normand Giard spend some time at the Missouri Institute of Psychiatry to become acquainted with our EEG laboratory.

With regard to the actual dates, there are two problems with October 15-19 - Dr. Itil will probably not be back until the end of that week, as I do not expect him officially until the 12th. I plan to be away at the American EEG Society meetings from October 1 to 5, and will probably not be back until the 8th, as I am planning to spend a few days in Los Angeles. For these reasons, I would suggest that Dr. Giard come after October 11.

While the accommodations of the St. Louis State Hospital are not the very best, we have on occasion been able to make them available to visitors. As he is coming alone, I will do my best to provide some place for him during his visit.

My best regards.

Sincerely yours,

Max Fink, M.D.  
Director
