Mr. Gary Boyer
Biomedical Section
Center for Studies of Narcotic
and Drug Abuse
National Institute of Mental Health
5600 Fishers Lane
Rockville, Maryland

Dear Mr. Boyer:

Our ongoing studies of cannabis - comparing hashish THC- Δ -9, and U.S. - NIMH marijuana in Greek chronic hashish users requires additional supplies of marijuana (35 grams, 2.6% THC- Δ -9) and THC- Δ -9.

Pilot studies on these subjects for other constituents are in progress, and we request additional amounts of THC- Δ -8, CBN, and CBD.

The appropriate BND-222C is enclosed.

Many thanks.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
