

Medlars C

November 21, 1963

Mr. Seymour Taine  
Chief, Bibliographic Division  
National Library of Medicine  
Bethesda, Maryland

Dear Mr. Taine:

I am writing at the recommendation of Dr. Brodmann of Washington University School of Medicine. It is her impression that the Medlars program is now available. I am interested in the possibility of carrying out a bibliographic search for articles during 1962 and, perhaps, the first half of 1963 in the area of electroencephalography and psychopharmacology, specifically in human subjects.

If such a search is possible, I should like to have the appropriate information and forms, if any, for such a request.

The Missouri Institute of Psychiatry has a special research library, and the request will come from that facility.

Thank you very much.

Sincerely yours,

Max Fink, M. D.  
Director
