University of Goteborg,
Sahlgrenska Sjukhuset,
413 45 Goteborg, Sweden.

Dear Jan,

I am pleased to tell you that your report "Systemic biochemical effects of ECT" will be published in our forthcoming volume on *Psychobiology of ECT*, which will be published by V. H. Winston and Sons.

The editors have made a few modifications in your text and we have had the text retyped. A copy of the revised text is enclosed.

We trust that these changes meet with your approval. In the event there are some changes which you will not accept, and they are minor, please wait until the galley proof. In the event that they are major changes, I would be grateful if you would send me a critique by air mail.

At one point you offered to critique my report. I do not recall if I was to send it to you, but in any case I am enclosing it and should you wish to send me a discussion, I would be pleased to add it to the text at the appropriate place. Please send it air mail at your earliest convenience.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
