Dr. A. Arthur Sugarman
Chief, Investigative Psychiatry Section
New Jersey Neuro-Psychiatric Institute
Box 1000
Princeton, New Jersey

Dear Arthur:

I want to take this opportunity to thank you for recommending Dr. Marjerrison to me during the recent APA Meetings. I met him the next morning at breakfast, and found him to be a sophisticated and exceptionally well qualified investigator. I was most pleased by the compatibility of our interests, for not only did we have similarity in the EEG field, but his interest in linguistic dovetails very well with my own. You may know that we are now in the process of testing some of our earlier linguistic — EEG correlations and I suggested that this program might be of specific interest to him.

However, as one of the few, well trained young investigators, he will have many opportunities and I suspect that he will make his decision on the basis of environmental as well as scientific considerations. We would be pleased to have him, and I want, once again, to thank you for thinking of us.

My best wishes.

Sincerely yours,

Max Fink, M. D.
Professor of Psychiatry
