

April 1, 1965

R. C. Pogge, M. D.  
Medical Director  
Dorsey Laboratories  
Lincoln 1, Nebraska

Dear Dr. Pogge:

Dr. Itil and I have completed our survey for SKF and we believe that our methods are suitable for the kind of analysis you requested. In order to work out a formal protocol and to see how much can be accomplished before the deadline of May 8, that you suggested in your recent letter, would you be able to come and visit us?

I should be available all of next week and April 12, but find that I will be out of town from the thirteenth to the sixteenth. Any other time this month will be satisfactory for both Dr. Itil and myself.

Sincerely yours,

Max Fink, M. D.  
Professor of Psychiatry
