Dr. Morton L. Kurland
Assistant Professor
Department of Psychiatry
New Jersey College of Medicine and Dentistry
24 Baldwin Avenue
Jersey City, New Jersey 07304

Dear Dr. Kurland:

In reviewing the proposed announcement of the "Symposium on Psychedelic Agents," I can only ask that the title of my presentation be defined a little more clearly. Would not "Psychopharmacology of Psychedelic Drugs" be a better description?

Would you or Dr. Dahlberg favor me by being more precise with regard to the focus you wish to present? Am I correct in assuming that you wish to emphasize the wide range of agents which have hallucinogenic properties, the commonalities of their neurophysiology and central effects, and the problems of abuse? Or, is the focus to be on LSD alone?

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
