Dr. Turan M. Itil
Missouri Institute of Psychiatry
5400 Arsenal Street
St. Louis, Missouri 63139

Dear Turan,

Enclosed are the three drafts of the trifluoperidol paper as of a year ago. At that time I reviewed the EEG material available and found that neither the computer records nor the frequency analyzer data lent themselves to analysis because I could not discern a single pattern. It was at that time that we examined the question of abstracting meaningful data from the seventeen computer numbers.

I have the following computer analysis folders and will send them back to you when you wish:

Gerwitz	10/27/64
Sexton	11/25/64
Richardson	3/25/65
Taylor	5/7/65
Gross	9/30/65
Tisdale	11/3/65

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
