Irene E. Waskow, Ph. D.
Research Psychologist
Psychopharmacology Service Center
National Institute of Mental Health
National Bank Building
Bethesda 14, Maryland

Dear Dr. Waskow:

The report "Language Patterns as Measures of Behavior and Neurophysiologic Change" which was presented at the 1959 American Psychiatric Association Meetings represent an interim report of the study which was published in the volume edited by Sarwer-Foner. We never published the comments of that report and for your work, I believe the reprints that you now have represent the major portion of our studies.

Sincerely yours,

Max Fink, M. D.
Professor of Psychiatry
