

January 22, 1969

Dr. Joyce Small  
LaRue Carter Hospital  
Indianapolis, Indiana

Dear Joyce,

In checking through some of my notes, I find that I had promised to send you a preprint. I regret the delay, but enclosed are two preprints describing our present view of drug classification using EEG criteria. One report is from the *Annual Review of Pharmacology* and another, a more popular version, from a forthcoming book "Drugs and the Brain."

I could not make Snowmas in January, but hope that I can do so at the Central EEG meetings in March. Is it possible for you to send me a copy of the program and any other data regarding motels?

My best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
