Mr. Seymour Weingarten
Plenum Publishing Corporation
114 Fifth Avenue
New York, New York 10011

Dear Seymour,

Thank you for your letter and the volume, Biochemistry of Brain and Behavior. I have flipped the pages of the volume, and find the text readable. There is some bleeding from the page behind, but this can be corrected by a more opaque quality paper. The time of production is extraordinary. Congratulations!

If we go through with an ECT conference, it will be with James McGaugh as a participant. We should consider your series, and I would ask that you send me such descriptions of the series on behavioral biology as may become available.

As for the marijuana conference - we have failed to find the funds and now hear that the New York Academy of Sciences is proceeding with the same idea in May.

Is there still room for another journal in biological psychiatry/psychopharmacology?

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
