Huntington, New York 11743

Dear Bill,

I want to thank you for the reprints which you sent, relating the effects of Dilantin on seizures. The data appears quite sparse, and except for the single report of Holt and Borkowski in 1951, none approach the problems of convulsive therapy.

I have recently instituted a study of convulsive therapy at Gracie Square Hospital and when I stimulate a few more young residents to work there, I think I will look at this problem.

Thank you for your cooperation.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
