

May 10, 1968

Dr. Alain Sanseigne
Squibb International
460 Park Avenue
New York, New York

Dear Alain,

Enclosed is a draft copy of the summary of the Sitges Symposium. I have prepared this as a summary for my staff, but it may be useful if you plan to prepare a volume of the Proceedings.

In the event that you do prepare a volume, we would like to summarize our observations in New York more adequately than are represented in this summary.

As I indicated on the phone, one of my former associates, Dr. David Graubert is anxious to undertake a clinical trial of depot fluphenazine and if such a study could be structured, we would be pleased to process the data in our center or assist in any other way.

Thank you once again for your kind remarks. I enjoyed the symposium very much. My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
