Prof. Dorothy Krieger  
Mount Sinai School of Medicine  
Fifth Avenue and 100th Street  
New York, New York 10029

Dear Dorothy:

I very much enjoyed our talk at Alice and Martin's anniversary celebration. Because I was puzzled by your comments regarding the availability of ACTH fragments, I wrote to my coworker at Oss, Dr. Henk van Riezen. He explained that, through a series of oversights, changes in administration, and administrative snafus, they had failed to send you the material you requested. As the extract from Henk's letter indicates, the fragments will be sent to you as soon as possible. He also is interested in the rationale for trials of OI-63 in Addison's Disease.

I am planning to attend the convocation on behalf of Morris Bender on Friday, March 15, at 4:00 p.m. Would it be possible for me to visit you earlier in the afternoon--about 2:30--first, to visit your laboratory and, second, to discuss ACTH and its fragments? If this is feasible, perhaps your secretary would call my office at (516) 444-2447.

My best regards,

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
