Dr. Dean Clyde  
Biometric Laboratory  
University of Miami  
250 Bird Road  
Coral Gables 46, Florida

Dear Dean:

Enclosed is the write-out of the first forty lines of the text of the article by Dr. Boudreau. We have a number of questions.

We will be able to redo the first line with the text number preceding the word "evaluation".

Number 1 in line 4 refers to references 1 - 5. Should this be deleted?

Question number two is the correction line 18. Is this done correctly? The same question with regard to line 26?

Finally, how do we handle the problem of such marks as the colon and the apostrophe. I believe these should be omitted. Is that correct?

Before we go any further, I would be grateful for any comments.

I have identified the patients in the EEG report from Hillside and have just asked for the age characteristics. As soon as I have those available, I will send them on to you.

Thank you again for the write-out.

Sincerely yours,

Max Fink, M. D.  
Director
