

April 2, 1968

Mr. Thomas Lewinson
Research Division
Hoffman-LaRoche
Nutley, New Jersey

Dear Mr. Lewinson:

Enclosed is a copy of our latest report. We are encouraged by this work to continue the discrimination of EEG patterns of new drugs to identify their proper clinical applications.

I would be grateful for copies of the reports you have recently written.

Good luck at the DIA Meeting.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
