Mr. Jay W. Klug
Experiential Physiology Department
Veterans Administration Hospital
Sepulveda, California 91343

Dear Mr. Klug:

I regret the delay in analyzing the tape which you sent to us, as it arrived while I was in Europe. We checked it yesterday and find that we have no difficulty in replaying the sine-wave on each channel. The voltages were satisfactory.

In order to find the record, we had to rewind the tape onto another reel. Apparently, after the signals were put on the tape, the tape was moved by fast forward to the take-up reel, and the take-up reel was sent to us. To enable us to follow your sequence of recording, we ask that the tape be rewound and sent to us from the left, or master, reel.

Thank you.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
