Mr. Paul A. Kiefer  
Translations Editor  
Consultants Bureau/Plenum Press  
227 West 17th Street  
New York, New York 10011

Dear Mr. Kiefer:

I have read the translated chapter from Prof. Saarma's book on schizophrenia, with some interest. I also read his own summary, pp. 164-170. The book reflects the usual Russian approach to psychiatric problems, and while he has some data, it is not presented in fashions we usually understand.

The data is interesting, and I believe a translation may serve to enhance communication. Particularly, if you could interest one of our Russophiles to write an introductory section or summary, transliterating the technical terms of the text.

You may wish to consult Dr. Wagner Bridger of the Albert Einstein College, New York, for his opinion - he is a local student of these problems.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
