Dr. G. F. Blane
Clinical Research Co-Ordinator
Reckitt & Colman
Danson Lane
Hull, England

Dear Dr. Blane:

Thank you for your reply to my inquiry about 5050-M.

We are indeed interested in developing a long-acting opiate antagonist, and if some clinically usable supplies of 5050-M were available, would be willing to undertake or underwrite the tests necessary for an INDA.

I am not acquainted with 320-M, but will try to obtain the available data, which I presume comes from Dr. Seevers.

I look forward to getting together in July in New York and ask that you write as soon as your trip plans are crystallized.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
