Detroit, Michigan 48207

Dear Al,

While I cannot help you with the first two items of your request in your letter of October 31, I am enclosing some items which may interest you regarding our data processing of the EEG. For the past few years I have devoted much of my interest to the problem of quantifying EEG changes using digital computer methods with specific reference to the problem of drug response. Much work has gone into the development of programs and learning the pitfalls in on-line processing. I would be pleased to assist you in any way that we can.

Good luck.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
