

December 28, 1964

Dr. George A. Ulett
Chairman, Dept. of Psychiatry
5400 Arsenal St.
St. Louis, Missouri

Dear George:

I should like to recommend the appointment of Dr. Habib Nathan as instructor in Psychiatry, in the Department of Psychiatry at the Missouri Institute of Psychiatry of the School of Medicine of the University of Missouri, effective July 1, 1965. Dr. Nathan was appointed to the Missouri Institute of Psychiatry in November, 1964. At the present time he is completing the third year of formal residency training at the University of Florida in Gainesville.

Dr. Nathan has shown unusual interest in research methodology, and has contributed an interesting report entitled "Preschool Sociopathy and Working Mothers". In this study, he has shown an awareness of the literature of the subject, and has demonstrated the application of the various survey methods to his problem.

A copy of his biographical sketch is attached. I look forward to his making significant contributions to the work of this department.

Sincerely yours,

Max Fink, M.D.
Director
