525 East 68th Street
New York 21, New York

Dear Marvin:

Thank you very much for your visit. I enjoyed it very much.

I am taking the liberty of enclosing a copy of the articles which interested you, as well as a later review which is more detailed. There have been a number of other less-documented reviews of the mechanism of ECT during the past four or five years, but none are as detailed as Fleming's. Of the more recent studies, the best is the work of Ottosson (Acta Psychiat. Scand., Suppl. 145, 1960).

My best wishes for the New Year.

Sincerely yours,

Max Fink, M. D.
Director
