

March 13, 1969

Dr. Jonathan O. Cole
Superintendent
Boston State Hospital
Boston, Massachusetts 02124

Dear Jonathan,

The specification of magnetic tape system described by Ernest Hartmann is compatible with our SP-300, for recordings made at 7 1/2, 3 3/4 and 1 7/8 inches per second recording speed. These speeds are identical to those available to us.

The majority of our tapes are recorded at 1 7/8 and 3 3/4 ips.

Give Ernest my best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
