Dr. Fini Schulsinger
Chief Physician, Psychiatric Clinic
Kommunehospitalet
Copenhagen K. Denmark

Dear Fini:

I have arranged for you to meet with the staff of the Department of Psychiatry of the Washington University School of Medicine on Friday, February 26th at noon. They will have a luncheon meeting, and I will promise to get you fed after your talk.

I have told them that you are the psychiatric mainstay of the Madnick and Kety projects. They are very interested in psychopathological assessments and would be interested in having you describe the selection of patients for both studies, your criteria and the problems, if any, that you have had in fulfilling the criteria.

In so far as you may have some psychophysiological data, I think you should be prepared to present some of it recognizing the fact, however, that this audience is a very critical one. I am sure that they will ask questions about your methodology.

I look forward to your visit and hope you have a rewarding trip.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
