Dr. Louis Gottschalk
Department of Psychiatry
University of Cincinnati
3231 Burnet Avenue
Cincinnati, Ohio

Dear Lou:

Your discussion of Dr. Don's paper was excellent and we have taken your comments to heart. I am taking the liberty of enclosing a mimeographed copy of that report after editing, and include on page fifteen a critique which largely echos your comments. We do have additional tapes in subjects without phenothiazine medication and these will be analyzed during the next few months. I hope that information plus some additional data on thaline controls will make a better report which should be available in the spring.

Thank you again for your comments and valuable recommendations.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
