Dear Bill,

Enclosed is an outline of an experiment to be undertaken with the medical students at the New York Medical College. As part of the class demonstration series in pharmacology, this demonstration is scheduled for January 9.

I would appreciate your cooperation in making available to me supplies of fenfluramine and concurrent samples of amobarbital, dextroamphetamine and placebo as outlined in the attached protocol.

If this is possible, the experiment will provide us with additional information concerning the sedative or stimulating qualities of fenfluramine. I will complete the forms necessary to consider this research study. Many thanks.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
