

June 28, 1970

Dear Dick,

With reference to the ACNP request regarding nominations for membership:

I would like to nominate two of my associates, whose work is well known to me, and who will be able to make significant contributions to the College:

Jovan Simeon, M.D.- Assistant Professor at the New York Medical College. He has been working with me since 1966, and is now a project leader, working in adolescent and child psychopharmacology.

Ali Keskiner, M.D.- Associate Professor, University of Missouri, St. Louis. I have known his work since he joined the Missouri Institute of Psychiatry in 1965. He is an independent investigator in schizophrenia, with particular interest in rehabilitation as it is enhanced by psychoactive drugs.

In addition, there are three young men at this College who are now working independently and should be candidates in the next few years:

Richard Abrams, M.D.
Arthur Zaks, M.D.
Richard Resnick, M.D.

I believe that I have already seconded the nomination of Dr. Keskiner this year; and will recommend Dr. Simeon next year, if this is permissible.

Good luck !

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
