Dear Sir:

A recent issue of *Medical World News* describes a preparation MEMPP produced by Dr. Henri Laborite. Your report stimulates our interests and we would be grateful if you would tell us who is the distributor or licensee for this compound in the United States.

This laboratory is established to assess the clinical efficacy of new compounds, especially in psychiatric populations, and we would be interested in clinical assessment of the compound described in your report.

Thank you for your co-operation.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
