Dr. Alain Sanseigne
Squibb International
909 Third Avenue
New York, New York 10022

Dear Alain,

Enclosed are the individual case summaries for each of the patients in the fluphenazine decanoate - fluphenazine enanthate crossover study. More complete case records are available in our files and will be supplied if you wish. These summaries indicate the essential nature of the changes accompanying the treatment and provide the background for our report which we submitted earlier.

I trust these are helpful.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
