

January 13, 1965

Dr. Leo G. Abood
Director of Research
University of Illinois
912 South Wood Street
Chicago, Illinois

Dear Leo:

It gives me great pleasure to tell you that the Program Committee of the Society of Biological Psychiatry has accepted the panel, "Anticholinergic Hallucinogen" for presentation at the 1965 Society meeting. The exact date and time of the session has not, as yet, been scheduled. The meetings will take place on Friday afternoon, April 30th, and May 1st and 2nd. I would suggest that you write the Americana Hotel in New York for a reservation.

In addition to the participants already known to you, the Program Committee suggested that we include the work of Dr. William P. Wilson, in this panel. He and his associates have submitted an abstract, a copy of which is enclosed, which fit our model very well and with the Committee's recommendation, his is the fifth report.

To coordinate this program, I would like to have an abstract of your remarks (a single page would be plenty) and a title, so that I can circulate these to each of the participants. I already have a copy of your report on anticholinergic psychotomimetics affecting motor activity and body temperature. In addition to this, I would appreciate any other reprints which may provide the basis for your remarks, so that I could duplicate these and send them on to each of the other participants.

I am looking forward to an interesting meeting. My best regards.

Sincerely yours,

Max Fink, M.D.
Prof. of Psychiatry
