Dr. Ed Grunewald
Geigy Pharmaceuticals
Ardsley, New York

Dear Ed,

Attached is a tear-off label from the available supply of placebo for ketimipramine. Would it be possible to make an additional 24x100 capsules for this study ?

We have completed the data analysis of the laboratory and the NIMH material on the first ketimipramine study, and I will send it to you within a few days -- I am awaiting some xerox copies of the lab data to make the package complete.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
