

February 19, 1971

Mr. Robert Cortese  
241 Paxton Street  
Paterson 3, New Jersey

Dear Mr. Cortese:

Unfortunately, we do not have the material to treat patients outside Metropolitan Hospital in New York City. The treatment is still experimental. I would suggest you continue on methadone until a narcotic antagonist is perfected and commercially available.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
