

November 24, 1969

Dear Mr. Chovan,

Thank you for your letter of November 10. We carry out procedures that are similar to Ross Adey, but working in man as we do, are limited to electrodes on the scalp. These do not permit the localizations possible in animals, and it is not feasible to attempt the exquisite localizations you recommend.

We do not have openings in our programs at present, but would be pleased to receive a copy of your curriculum vitae with a description of the job you now hold and what kind of a position you are looking for. Also, present salary levels.

Again, our thanks for your interest.

Sincerely yours,

Max Pink, M.D.
Professor of Psychiatry
