Dr. Fletcher Owens  
A. H. Robins Company  
1407 Cummings Drive  
Richmond 20, Virginia

Dear Dr. Owens:

I have had my first opportunity to prescribe <sup>Ty</sup>batran. In the experimental protocol which I have recently sent to you the recommended dosage will be 12 grams. The size of the capsule and the number that will need to be ingested will preclude general acceptance.

May I ask you to inquire as to the availability of a one or even a two gram tablet or capsule? If technically possible, may I urge you to ask for a supply to be produced for experimental use?

Many thanks.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
