Dr. Michael G. Saunders
The Winnipeg General Hospital
Electroencephalograph Department
700 William Avenue
Winnipeg 3, Manitoba
Canada

Dear Mike:

Following your letters I met with Drs. O'Leary and Landau on one occasion; and lately with Drs. Joyce Small, Robert Woolsey, and Turan Itil, to discuss the next meeting of the Central EEG.

The suggested dates of November 10 or 17 are impractical, insofar as the American EEG meetings will just have been held. Secondly, the Institute laboratories will not be operational. Bliss would not be in a position to be host as that institution will be undergoing construction.

For this reason, we would suggest the meeting be held in early March or mid February.

If this is agreeable, is it your wish to have the St. Louis members act as program committee as well as arrangements? Also, please advise:

- (1) Usual number of registrants
- (2) 2 or 3 days?
- (3) Who prints announcements, mailings, etc.?
- (4) Who plans technicians' affairs?

If a meeting must be held in November, then it would be necessary to find an alternate host institution.

Please advise. Thanks.

Sincerely yours,

Max Fink, M. D.
Director
