Dr. E. Donchin
Division of Neurology
Stanford University
Palo Alto, California

Dear Dr. Donchin:

It was a pleasure to discuss the problems of simultaneous stimulation during the recent EEG Society meetings. I am enclosing copies of two reports from my laboratory which describe the studies undertaken some years ago. I am in the process of summarizing the observations in our present study and will send you a copy as soon as it is mimeographed.

Thank you also for the citations which I have found and which are indeed helpful. May I request a reprint of your recent article in the *EEG Journal*?

Good luck in your tactile studies.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
