Dr. Nathaniel H. Siegel  
Chief, Social Sciences Section  
Training and Manpower Resources Branch  
National Institutes of Mental Health  
Bethesda, Maryland 20014

Dear Nat,

It was kind of you to read the report on family aspects. I was pleased with your two principal comments and we have gone ahead and will check the literature for the names which you have indicated. Your awareness that the criteria were ill-defined was also very helpful and we are redrafting that section of the report.

Since my last note, we have received an additional dozen reprint requests including one from Sy Fisher at Syracuse, who wrote for ten copies to be used in a research course for residents! Since the days of the F-Scale paper, I have never received so many requests so quickly. This must tell us something about the interests of our coworkers.

My best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
