Dr. B. Weber
Hopital Boucicaut
78, rue de la Convention
75 Paris XV^e France

Dear Dr. Weber:

At the suggestion of Dr. H. C. B. Denber, I am pleased to submit the enclosed abstract of our collaborative effort for presentation at the 2d International Symposium on Phenothiazines in Paris in October 17 - 20. This study demonstrates one significant aspect of the brain function changes systematically induced by chronic phenothiazine administration in man.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
